

Week 5: Make it equal 11 05 20

Use the numbers to make the calculations equal. The problems get harder. Try as many as you want, start wherever you want!

Problem 1

Add these numbers to make it equal.

6, 12, 4, 2, 8

$$\square + \square = \square = \square - \square$$

Problem 4

Add these numbers to make the calculations all equal the same number.

7, 25, 37, 38, 63, 9, 100

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square$$

Problem 2

Add these numbers to make it equal.

6, 10, 2, 4, 12

$$\square + \square = \square = \square - \square$$

Problem 5

Add these numbers to make the calculations all equal the same number.

40, 4, 7, 9, 12, 19, 28

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square$$

Problem 3

Add these numbers to make it equal.

100, 74, 49, 26, 25

$$\square + \square = \square = \square - \square$$

Problem 6

Add these numbers to make the calculations all equal the same number.

45, 36, 279, 180, 9, 234, 4, 9, 5

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square \times \square = \square$$

$$\square \div \square = \square$$
